

A black and white photograph of a rebar grid. The grid consists of several horizontal and vertical steel bars with a ribbed texture. The bars are interconnected at various points, with some showing signs of welding or tying. The background is a blurred grid of similar bars, creating a sense of depth. In the top left corner, there is a logo with the letters 'S', 'R', 'A', 'H', 'B', 'X' and a red circle. In the bottom left corner, there is text including 'S5', 'WORKSHOP', 'DECEMBRE 2011', 'AURELIA PETIT', and 'COLINE MARGUIN'.

CRASH BOX

PARTICIPATION AVANT PROJET

La CrashBox comme un tamis qui filtre et récupère les agrégats de béton et ferraille du bâtiment détruit. Elle se constitue, se crée, par l'explosion du bâtiment. La démolition engendre la création de quelque chose de nouveau. Pendant la démolition, la CrashBox est une oeuvre caméléon parmi les débris. Après la démolition, elle se fait oeuvre «mémoriale», une urne qui rassemblerait les cendres du bâtiment disparu... Sauver le bâtiment ? Récupérer les morceaux ? Cette mémoire physique s'ajoute à la mémoire visuelle/virtuelle qu'offre la caméra.
